This briefing summarises the results of a research project on why people choose or do not choose Gaelic-medium education and what its effects are on pupils’ attainment.

What is Gaelic-medium Education in Current Practice?

The research gathered evidence about the current practice of Gaelic-medium education. Gaelic-medium primary education begins with an immersion phase in which children study all of their subjects through the medium of Gaelic. English is typically introduced towards the end of Primary 3, but Gaelic remains the predominant mode of learning throughout primary. The aim is that pupils achieve equal competence in Gaelic and English by the end of primary school.

Gaelic-medium education in Scotland started in 1985. Pupil numbers increased rapidly until the late 1990s and have grown more slowly. In session 2008-9, there were 2,206 pupils in Gaelic-medium primary education and 397 in Gaelic-medium secondary education. There were two free-standing Gaelic primary schools and 58 Gaelic streams in primary schools that also provided English-medium education. One secondary school provided almost all subjects through the medium of Gaelic, and 18 taught some subjects using Gaelic. Most pupils in Gaelic-medium education do not understand Gaelic when they start pre-school, but some children have acquired Gaelic at home.

Dè tha ann am Foghlam Tro Mheadhan na Gàidhlig An-dràsta?

Tha a’ bhileag fiosrachaidh seo a’ toirt seachad geàrr-chunntas a’ raonadh pròiseact ranndhachaidh air carson a bhios, no nach bi, daoine a’ tagadh foghlam tro mheadhan na Gàidhlig agus a’ bhuaidh a th’ aige air buileachadh nan sgoilearan.

Tha anns an rannsachadh fionnais air mar a tha foghlam tro mheadhan na Gàidhlig ag obair an-dràsta. Tha foghlam tro mheadhan na Gàidhlig sa bhun-sgoil a’ tòiseachadh le greis ’bogaidh’ nuair a dh’ionnsaicheas a’ chlanna a h-uisice nan leòranna eadar ’as trice bidh Beurla ga toirt a-steadh faisg air deireadh Prìomh 3, ach is i a’ Ghàidhlig am prìomh chànan ionnsaicheadh tro bhliadhnaichean na bun-sgoile air fad. Is e an t-amas gum bi an aon chomas aig sgoilearan sa Gàidhlig agus sa Bheurla mus cuir iad croích air a’ bhun-sgoil.

Thòisich foghlam tro mheadhan na Gàidhlig ann an Alba ann an 1985. Chaidh àireamh nan sgoilearan an-àirde gu luath gu deireadh nan 1990an agus tha iad air a bhith ag eirigh nas slaodachan bhon am sin. Anns an t-seisean 2008-9, bha 2,206 sgoilearan ann am foghlam tro mheadhan na Gàidhlig sa bhun-sgoil agus 397 ann am foghlam tro mheadhan na Gàidhlig san àrd-sgoil. Bha dà bhun-sgoil Ghàidhlig fa leth ann agus 58 aonadan Gàidhlig ann am bun-sgoiltean a bha a’ tabhann foghlam meadhain-Bheurla cuideachd. Bha aon àrd-sgoil a bha a’ teagasg cha mhòr a h-uisce cuspair tron Ghàidhlig, agus 18 far an robh cuid de na cuspairean tron Ghàidhlig. Chan eil a’ chuid as motha de chlanna ann am foghlam tro mheadhan na Gàidhlig a’ tuigseinn Gàidhlig nuair a thòisicheas iad san ro-sgoil, ach bidh clann a thog Gàidhlig aig an taigh a’ dol ann cuideachd.
Aims of the Research

The research had two aims:

To investigate the reasons why people choose or do not choose Gaelic-medium education at the primary and early secondary school stages.

To investigate Gaelic-medium pupils’ attainment in primary and early secondary school, and to compare this with the attainment of their English-medium counterparts.

What the Research Did

Approach to investigating choice

Eight primary-secondary school pairs were selected, covering the range of contexts in which Gaelic-medium education is provided. Interviews were conducted with the schools’ headteachers and Local Authority Gaelic advisers (22 in total), with 55 parents of pupils in Primary 7 or Secondary 2 Gaelic medium and with 30 parents of pupils in Primary 7 or Secondary 2 English medium.

Approach to investigating attainment

Pupil attainment was studied mainly using two surveys conducted by Scottish Government statisticians in 2007: the Scottish Survey of Achievement, and the Survey of Gaelic Education. These enabled comparison of the attainment of Gaelic-medium pupils in Primary 5 and Primary 7 (168 and 140 pupils respectively) with three groups of P5 and P7 English-medium pupils:

(i) All English-medium pupils in the Scottish Survey of Achievement’s national sample (7,631 P5 and 7,829 P7 pupils).

(ii) English-medium pupils chosen to match the Gaelic-medium pupils with regard to gender, socio-economic status and local authority area (164 P5 and 149 P7 pupils).

(iii) English-medium pupils in schools which had a Gaelic stream (45 P5 and 36 P7 pupils).

Amasan an Rannsachaidh

Bha dà amas aig an rannsachadh:

Sgrùdadh a dhèanamh air na h-adhbhharan a bhios, no nach bi, daoine a’ tagadh foghlam tro mheadhan na Gàidhlig aig ire na bun-sgoilte agus bliadhnaichean tràthna na h-àrd-sgoile.

Sgrùdadh a dhèanamh air buileachadh sgoilearan meadhain-Ghàidhlig sa bhun-sgoil agus bliadhnaichean tràthna na h-àrd-sgoile, agus comeas a dhèanamh eadar seo agus buileachadh sgoilearan ionnan riuth ann am foghlam meadhain-Bheurla.

Na Rinn an Rannsachadh

Modh-obrach anns an sgrùdadh roghainn

Thaghadh ochd paidhrichean bun-sgoile is àrd-sgoile, a’ riocdhachadh an raon shuidheachaidhean far a bheil foghlam tro mheadhan na Gàidhlig ga thabhann. Rinneadh agallamh le ceannardan nan sgoltean agus comhairlichean Gàidhlig nan Ùghdarrasan Ionadail (22 uile gu léir), le 55 pàrant sgoilearan meadhain-Ghàidhlig ann am Priomh 7 (P7) no Bliadhna 2 den àrd-sgoil (AS2) agus 30 pàrant sgoilearan meadhain-Bheurla ann am P7 no AS2.

Modh-obrach anns an sgrùdadh buileachaidh

Rinneadh sgrùdadh air buileachadh sgoilearan, a’ cleachdadh, airson na mòr-chuid, dà shuirbhidh a rinn luchd-staitistearachd Riaghaltas na h-Alba ann an 2007: an Suirbhidh Albannach air Coileanadh, agus an Suirbhidh air Foghlan Gàidhlig. Thug seo cothrom dhuinn comeas a dhèanamh eadar buileachadh sgoilearan meadhain-Ghàidhlig ann am Priomh 5 agus Priomh 7 (168 agus 140 sgoilean an urra) agus na tri buidhnean sgoilearan meadhain-Bheurla P5 is P7 a leanas:

(i) A h-uile sgoilear meadhain-Bheurla anns an t-sampall nàiseanta aig an t-Suirbhidh Albannach air Coileanadh (7,631 sgoilear P5 agus 7,829 sgoilear P7).

(ii) Sgoilearan meadhain-Bheurla a thagadh airson freagradh ris na sgoilearan meadhain-Ghàidhlig a réir gné, inbhe shòisio-eaconamach agus sgìre ùghdarrais ionadail (164 sgoilear P5 agus 149 sgoilear P7).

(iii) Sgoilearan meadhain-Bheurla ann an sgoiltean le aonad Gàidhlig (45 sgoilear P5 agus 36 sgoilear P7).
A postal survey was also undertaken of attainment in Primary 3, 5 and 7 and Secondary 2 in session 2008-9 in primary schools with Gaelic-medium provision and secondary schools which provide Gàidhlig (Gaelic for Fluent Speakers) as a subject.

Findings: Choice

Choice of Gaelic-medium education

There were two main reasons why people choose Gaelic-medium education. The first was heritage: of family, community or nation. Some parents regarded themselves as a ‘lost generation’ who had missed out on the family language, and thus wanted their children to acquire it.

Others cited allegiance to communities where Gaelic is spoken. Several linked the choice of Gaelic-medium education to a wider interest in Scottish culture, and a belief that Gaelic is an essential part of Scottish identity.

Identity and choice

My grandparents were native speakers and both lost it. We just felt it was a shame that we hadn’t learnt it, that my father hadn’t learnt it and then I hadn’t learnt it, and I just thought of all these people that lost the chance. So we just decided to try Gaelic medium.

(parent, Highlands and Islands, non-Gaelic community)

The second main set of reasons for the choice of Gaelic-medium education was the perceived benefit of a child’s becoming bilingual. Many parents had read about the research on bilingual education and bilingualism which suggests that being bilingual stimulates children’s learning.

Toraidhean: Roghainn

A’ roghnachadh foghlam tro mheadhan na Gàidhlig

Bha dà prìomh adhbhar a roghnaich daoine foghlam tro mheadhan na Gàidhlig. B’ e dualchas a’ chiad adhbhar: dualchas teaghlaich, coimhearsnachd no nàisein. Bha cuid a’ faireachd dàin ann robh iad nam pàirt de ‘ghinealach caillte’ nach d’fhuaire cothrom cànan an teaghlaich ionnsachadh, agus bha iad airson gum biodh i aig an cùd cloinne.

Bhruidhinn daoine eile air dàimh ri coimhearsnachdhan far a bheil Gàidhlig ga bruidhinn. Bha grunn a’ dèanamh ceangal eadar foghlam Gàidhlig agus an uídh fharsaing ann an cultar na h-Alba, agus iad den bheachd gu bheil a’ Ghàidhlig aig cridhe fèin-aithne na h-Alba.

Fèin-aithne agus roghann

My grandparents were native speakers and both lost it. We just felt it was a shame that we hadn’t learnt it, that my father hadn’t learnt it and then I hadn’t learnt it, and I just thought of all these people that lost the chance. So we just decided to try Gaelic medium.

(pàrant, seann-Ghàidhealtachd, gun mhòran Gàidhlig sa choimhearsnachd)

B’e an dárna prìomh adhbhar airson foghlam tro mheadhan na Gàidhlig a thaghadh am beachd gu robh e na bhuanachd do leananbh a bhith dà-chànanach. Bha mòran phàrantan air leughadh mun rannsachadh air foghlam dà-chànanach agus dà-chànanas a tha a’ nochtadh gu fadadh dà-chànanas iomnsachadh leanaibh a bhrosnachadh.
Two other reasons were mentioned in relation to the choice of Gaelic-medium education. One was that Gaelic-medium education attracted a particular kind of highly educated parent who thinks about education. The other was simply continuity (from pre-school to primary or primary to secondary): once pupils were in the Gaelic-medium system, there was reluctance to waste what had been learnt.

<tr>
<td><em>Studying the mechanics of a language gives children skills that they can transfer. They have a facility for picking up another language having studied one.</em></td>
</tr>
<tr>
<td>(headteacher, Gaelic-speaking area)</td>
</tr>
</tbody>
</table>

The research also investigated why people do not choose Gaelic-medium education when it is available. One reason was when children who are already at school move from an area where there is no Gaelic-medium education into a place where it is provided. Another common reason for choosing English medium was some parents' fear that they could not help their child with homework in a language they did not understand.

<tbody>
<tr>
<td>Rinn an rannsachadh sgrùdadh a bhios daoine a' roghnachadh an clann a bh' a thogail a thaoghlam tro mheadhan na Gàidhlig. B' e aon gu robh foghlam tro mheadhan na Gàidhlig tarraingeach do cuid de phàrantan sàr-fhoghlamaichte a bhios a’ smaoineadachd gu domhainn mu dheidhinn foghlam. B’ i leantalachd an t-adhbhar eile (bho ro-sgoil gu bun-sgoil no bun-sgoil gu árd-sgoil): aon uair ’s gu robh sgoilearan anns an t-siostam mheadhan-Ghàidhlig, bha daoine aindreochadh na bhathas air ionnsachadh mar-thà a chail.</td>
</tr>
</tbody>
</table>

Some English-medium parents, although favouring the revitalisation of the Gaelic language, doubted if education was the best means to language maintenance, and thus had not chosen Gaelic-medium education for their child.
Findings: Attainment

Attainment in English by Gaelic-medium and English-medium pupils

Pupils in Gaelic-medium education, who are not exposed to English in the classroom until at least Primary 3, catch up with and overtake English-medium pupils in their command of English. By Secondary 2, whereas only one half of English-medium pupils had reached the expected level E in English reading and writing, three quarters of Gaelic-medium pupils had done so.

Buileachadh sa Bheurla aig sgoilearan meadhain-Ghàidhlig agus sgoilearan meadhain-Bheurla

Bidh sgoilearan ann am foghlaam tro mheadhan na Gàidhlig, nach eil a’ faighinn Beurla san t-seòmar-sgoile gu Prìomh 3 co-dhiù, a’ breith air agus a’ dol seachad air sgoilearan meadhain-Bheurla ann an comasan sa Bheurla. Ro AS2, ged nach robh ach dàrna leth nan sgoilearan meadhain-Bheurla air Ìre E, an Ìre iomchaidh, a ruighinn ann an leughadh agus sgriobhadh na Beurla, bha trì cairteal nan sgoilearan meadhain-Ghàidhlig aig an Ìre seo.

Tús: Suirbhidh nan Sgoiltean, 2009
Source: Survey of Schools, 2009
Gaelic-medium and English-medium pupils’ attainments in Science and Maths

In Science and Maths, the attainment of Gaelic-medium and English-medium pupils was broadly equal when Gaelic-medium pupils were compared with English-medium pupils of similar socio-economic status.

Thus Gaelic-medium pupils’ attainment in other areas of the curriculum does not seem to be affected by their learning subjects through the medium of Gaelic (typically their second language).

Buileachadh sgoilearan meadhain-Ghàidhlig agus meadhain-Bheurla ann an Saidheans agus Matamataig

Ann an Saidheans agus Matamataig, bha buileachadh sgoilearan meadhain-Ghàidhlig agus meadhain-Bheurla an ìre mhath co-ionnan nuair a chaith sgoilearan meadhain-Ghàidhlig a shamhlachadh ri sgoilearan meadhain-Bheurla den aon inbhe shòisio-eaconamach.

Tha e coltach, ma-thà, nach eil buaidh aig ionnsachadh tro mheadhan na Gàidhlig (mar as trice an dàrna cànan aca) air buileachadh sgoilearan meadhain-Ghàidhlig ann am pàirtean eile den churraicealam.

Buileachadh ann an saidheans: Prìomh 7 (ceudad aig an ire a th’ air a taisbeanadh)

Attainment in science: Primary 7 (percentage at the level shown)

Tús: Suirbhidh Albannach air Coileanadh, 2007
Source: Scottish Survey of Achievement, 2007
Gaelic-medium pupils’ comparative attainments in Gaelic and English

Gaelic-medium pupils’ attainment in English had overtaken their attainment in Gaelic by the end of primary: 83% of Gaelic-medium pupils passed Level D Gaelic reading, compared with 93% achieving Level D English reading; the difference was similar for writing.

Conclusions

These results are consistent with previous research. In relation to attainment, Gaelic-medium pupils acquire or develop an additional language without harming their attainment in other areas of the curriculum. People choose Gaelic-medium education because of this educational gain, and also because they value the language as part of their cultural identity.

Coimeas eadar buileachadh ann an Gàidhlig agus ann am Beurla aig sgoilearan meadhain-Ghàidhlig

Bha buileachadh sgoilearan meadhain-Ghàidhlig ann am Beurla air a dhol seachad air am buileachadh ann an Gàidhlig ro dheireadh na bun-sgoile: bha 83% de sgoilearan meadhain-Ghàidhlig air faighinn tro Ìre D ann an leughadh na Gàidhlig, an coimeas ri 93% a’ toirt Ìre D a-mach ann an leughadh na Beurla; bha an aon seòrsa eadar-dhealachaidh ri fhacinn ann an sgrìobhadh.

Co-dhùnaidhean

Tha na toraidhean seo ionnan ri toraidhean rannsachaidh a rinneadh roimhe. A thaobh buileachadh, bidh sgoilearan meadhain-Ghàidhlig a’ togail no a’ leasachadh cânan a bharrachd gun cron a dhèanamh air am buileachadh ann am pàirtean eile den churraicealam. Bidh daoine a’ roghnachadh foghlam tro mheadhan na Gàidhlig air sgàth na buannachd foghlaim seo, agus cuideachd airson gu bheil iad a’ cur luach air a’ chànan mar phàirt den fhèin-aithne chultarach aca.
